The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 5-238830. No distinction is seen between the aluminum nitride sintered body disclosed in JP 5-238830, and that recited in claims 3-5.

Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 3-228809. In view of Miura et al. JP 3-228809 discloses a method for preparing aluminum nitride powder by reacting aluminum powder with nitrogen while controlling the oxygen content to as low as 20 ppm. (See the English Abstract.) The difference between the process disclosed by JP 3-228809, and that recited in claims 6 and 7, is that JP 3-228809 does not disclose that the product is taken out at a temperature of at most 100 C. It would be obvious from Miura et al to take the product of JP 3-228809 out at a temperature of at most 100 C, since Miura et al disclose a method for producing aluminum nitride with rapid cooling of the reactants. (See the Abstract.)

Claims 6 and 7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 2003-119010. Applicants admit on page 8 of the specification that the process recited in claims 6 and 7 is shown by JP 2003-119010.

It is noted that applicants have not responded to the above grounds of rejection.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no "description support" in the original specification for the coarse particles being present in an amount of from 50 to 60 volume %. Applicants' argument, that support exists at page 10, lines 1-4, is not convincing, since a range of 50 to 65 volume % would not provide support for a range of 50 to 60 volume %.

Claims 1, 2, 9, 10 and 12 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
